## Cumulative Effects Conference

for Atlantic Indigenous Communities

June 2, 2022

APC is very excited to share that Chief Andrea Paul and Mindy Denny will be co-presenting at APC's Cumulative Effects Conference about the Pictou Landing First Nation Well-Being Baseline Study. This study quantifies the impacts of Northern Pulp and the Boat Harbour Remediation Project on the well-being of Pictou Landing #FirstNation community members. Chief Andrea and Mindy will shine a light on the #cumulativeeffects of industrial activities in

Pictou Landing First Nation and how the #community is moving forward toward a healthier future.

The Cumulative Effects Conference will be an opportunity for communities to learn about the cumulative effects project being carried out by APC, as well as different tools and resources that are available to help Atlantic Indigenous communities address cumulative effects issues. The conference will also provide a safe space for sharing stories, knowledge, concerns and ideas related to cumulative effects issues with the opportunity for communities to provide feedback on what they would like to see come out of the project. We have an exciting lineup of speakers presenting on different tools, resources, studies and projects that can be referred to or used to inform future cumulative effects initiatives in Atlantic Indigenous communities.
